

# The Identity of our Creator

*And Yahuah Elohiym called unto Adam, and said unto him, "Where are you?" And he said, "I heard your Voice in the garden, and I was afraid, because I was naked; and I hid myself".*

BERESHITH (GENESIS) 3:9-10

## **Intelligent Designers Communicate**

We have provided evidence illustrating that the Theory of Evolution is statistically impossible. It is a theory that is collapsing in the scientific community. Originally, it provided an alternate explanation for the origins of life than the Creation account in the Word of our Father. Now that this theory is disintegrating, people are beginning to admit that there is an Intelligent Designer who brought life into being. Some people think it is an alien species from another planet. Some think our Intelligent Designers are fallen angels. And of course, we have the plethora of religious belief systems who attribute our origins to their respective deities. However, the following statement would be true in every case.

**"Intelligent Designers" are "intelligent".**

Intelligent Designers would have a means to communicate with others and their creation whether it was an alien species or the Mighty One of the Hebrew people. Let's think about this for a moment and consider the amazing human body. Mankind considers themselves "intelligent" but they cannot reproduce a human body. They can take reproductive cells and

grow a human body. They can probably clone a human body. However, both of these situations begin with pieces of an original body. They simply do not have the intelligence to create a human body from scratch. Instead, they create robots that are “like” men and women. If we consider ourselves “intelligent” then the One who designed us in the beginning must exceed our intelligence by leaps and bounds. He created the human body thousands of years ago without modern technology. Whoever this Being is, He is extremely intelligent.

We would expect an Intelligent Designer with these kinds of capabilities to have His own language and a method for communicating with His Creation. Does it make sense that an engineer designs a robot that does not speak the language of the engineer who created it? Why would we think our Intelligent Designer would be any different? Here is the logic.

- If our Intelligent Designer has a language, He produces sounds by the turning of His lips which can be understood by both speaker and receiver. What is the point of a language, if a message cannot be communicated to another individual?
- These sounds produced by the mouth of our Intelligent Designer form words with a specific meaning as in the examples of “DOG” and “GOD”. They are pronounced in a certain order and have their own unique definitions. Our Intelligent Designer would have His own vocabulary of words.
- The sounds produced by our Intelligent Designer to form words are assigned to a set of specific characters as in the examples: “D-O-G” and “G-O-D”.
- These specific characters are assigned a specific sound and symbol. Together they form an Alphabet. Our Intelligent Designer must also have His own “Alephbet” that He uses to form words.
- He would combine words in a certain order to communicate a message to a receiver.

Our Intelligent Designer would technically be more advanced than ourselves since He is the Engineer and we are the created. We would expect an Intelligent Designer who is “intelligent” to have both a spoken and written language like us or far more advanced than us. He would design the receiver to know and understand His “Alephbet”; its associated sounds; the definitions of each individual character; His vocabulary; His sentence order; and the written language associated with the spoken language.

For example, if our Intelligent Designer spoke the French language, He would not create mankind to speak, read and understand English. This would create a barrier to communication. Our Intelligent designer would communicate a message but it would not be understood by the receiver. Therefore, we can conclude that our Intelligent Designer created mankind to speak and write His language. This is the most logical conclusion. Engineers today do not create their robots to speak in a language they do not understand. If this is the case, then we can expect to see languages today linked to the original language of our Intelligent Designer.

Since the Theory of Evolution is mathematically impossible after the discovery of DNA (deoxyribonucleic acid) and proteins, it is true that an Intelligent Designer created mankind. It is the only explanation that makes sense based on discoveries in science. Some people believe it may have been an alien species that visited earth. Some people believe it is the Creator mentioned in the Hebrew writings. Whether the Intelligent Designer is a group of alien beings or the Creator mentioned in the Hebrew writings, the Intelligent Designer would have a language used to communicate with His creation. The Intelligent Designer spoke to man and man understood what He said. Man spoke to his Intelligent Designer and He understood what man said. This is effective communication which necessitates a common language.

If a French man gave an English man instructions or tried to communicate with him, the English man would not understand. The English man could not respond or follow his instructions because they speak different languages. If an English man gave instructions to another English man, they would understand each other. The recipient of the instructions could complete the task that was asked of him. This is only possible if people can understand one another's languages.

of the Garden.

In Bereshith (Genesis) 11:1, it says that everyone spoke the same language. They understood one another's speech. If our Intelligent Designer is Yahuah Elohiym as described in His Word, then the language they spoke was His language. Yahuah Elohiym would have created Adam to speak and write His Language. The Hebrew writings found in Bibles and Tanakhs document a conversation between Yahuah Elohiym and the first man and woman. Here is that conversation.

And they heard the Voice of Yahuah Elohiym walking in the garden in the cool of the day: and Adam and his wife hid themselves from the presence of Yahuah Elohiym amongst the trees

**Intelligent Designer:** And Yahuah Elohiym called unto Adam, and said unto him, “Where are you?”

**Man:** And he said, “I heard your Voice in the Garden, and I was afraid, because I was naked; and I hid myself”.

**Intelligent Designer:** And he said, “Who told you that you were naked? Have you eaten of the tree, whereof I commanded you that you should not eat?”

**Man:** And the man said, “The woman whom you gave to be with me, she gave me of the tree, and I did eat”.

**Intelligent Designer:** And Yahuah Elohiym said unto the woman, “What is this that you have done?”

**Woman:** And the woman said, “The serpent beguiled me, and I did eat”.  
(*Bereshith/Genesis 3:8-13*)

When Yahuah Elohiym spoke to Adam and Chavah (Eve), they understood His speech and responded appropriately. Yahuah Elohiym understood their words and responded appropriately. This means they spoke and understood one another’s language. They had the same “Alephbet” with specific sounds. They used the same words with the same definitions. They spoke sentences using the same grammar. If Yahuah Elohiym is our Intelligent Designer, then it is clear that He created Adam and Chavah to speak the same language. This makes sense because engineers who create robots ensure that one of the languages known by the robot is the language of the engineer. He or she would want to be able to communicate with his or her robot.

In Bereshith (Genesis) 5, a lineage is documented from Adam to Noach (Noah). When parents have children, they teach them to speak and write in their language. It is transferred from father to son. Adam did not know any other language than the one given to him by his Intelligent Designer. Therefore, we can conclude that Adam taught his sons and daughters to speak the same language used by our Intelligent Designer.

We would expect this to occur with any Intelligent Designer. If an alien species programmed mankind to speak their language, fathers would teach this language to their sons and daughters as well. They would not know any other language to teach their children in the beginning. It would be the language of their Intelligent Designer whether it was an alien species or Yahuah Elohiym.

There were ten generations from Adam to Noach (Noah). The name “Noach” is a Hebrew name just like “Adam”. The context of the passage regarding the birth of Noach, provides the meaning of the name, “Noach”.

And he called his name Noach, saying, This same shall comfort us concerning our work and toil of our hands, because of the ground which Yahuah has cursed.  
(*Bereshith/Genesis 5:29*)

This definition can be confirmed in a Hebrew lexicon, verifying its “Hebrew” origins. We use *The Ancient Hebrew Lexicon of the Bible* written by Jeff A. Benner which defines “Noach” as:

נח ( common, נוּחַ / n.w.hh) **Translation:** REST (V) **Definition:** Freedom from activity or

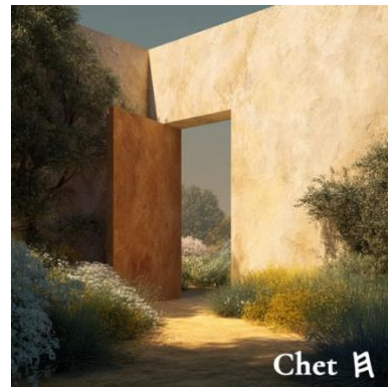

labor. To rest from trouble or labor. **Alternate Translations:** leave (when written in the hiphil [causative] form) **Edenics:** night - from the German nacht, as the time of rest **KJV Translations:** rest, cease, confederate, down, lay, quiet, remain **Strong's Hebrew #:** h.5117

נוח (נוח) **Definition:** A state of quiet and rest from burdens, work or enemy.

“Noach” means a “state of quiet rest from burdens, work or enemy”. This aligns with the context of the passage itself. Nearly every Hebrew word is related to a two-lettered root. The name “Noach” is based on the two-lettered root word that uses the letters “nun” and “chet”. The *Ancient Hebrew Lexicon of the Bible* defines it the following way:

נוח (נוח) **Action:** Guide, Rest, Sigh, Deposit **Object:** Rest **Abstract:** Comfort  
**Definition:** The shepherd would guide his flock to a place of water. Here is water for drinking as well as green grass for pasturing. Once the flock arrives, they are free to rest after the long journey. A guided journey to a place of rest. A sigh of rest. **Ancient Hebrew:** The pictograph נ is a picture of a seed representing continuance, the ח is a picture of a wall that separates the inside from the outside. Combined these mean "continue outside".

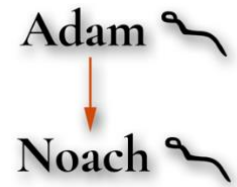

The letter “nun” looks like a sprouting seed and the letter “chet” is a picture of a wall that separates the outside from the inside. We can see this association between the letter’s symbol itself and the picture it represents with our own eyes.

This is the question, we must ask ourselves based on the above evidence:

**Can these pictures prove that the meaning of “Noach” means “a state of quiet rest from burdens, work or enemy”?**

When seeds sprout, they look like this picture and the letter “nun” as well. Seeds reproduce a replica of the original plant, animal or man. They “continue” the lineage in the next generation. Noach (Noah) was a replica of Adam passed down through ten generations. He likely had different physical features, but Noach was a man just like Adam was a man. The letter “nun” could represent any of Adam’s offspring.

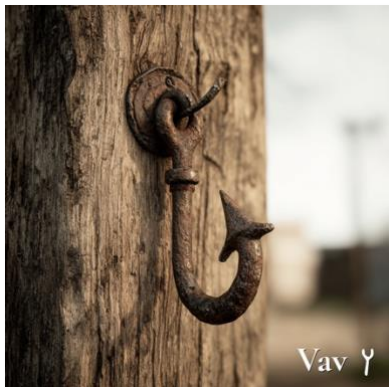

The letter “chet” is a picture of a wall that separates the inside from the outside. In order to understand how this letter applies to the name “Noach,” we must consider the situation from the perspective of the Intelligent Designer of the Bible and Tanakhs.

In the beginning, Adam and Chavah (Eve) lived on the inside of the Garden of Eden. After they had disobeyed the Voice of Yahuah, they were removed from the Garden of Eden and placed outside its walls.

Therefore, **Yahuah Elohiym sent him forth from the Garden of Eden**, to till the ground from where he was taken. So, **he drove out the man**; and he placed at the east of the Garden of Eden Kerubiym, and a flaming sword which turned every way, to keep the way of the Tree of life. (*Bereshith/Genesis 3:23-24*)

Yahuah Elohiym is on the inside of the Garden and mankind is on the outside of the Garden. The root of the name “Noach” means “continue outside”. Noach (Noah) was a replica of Adam who continued outside the Garden of Eden. We can see this definition when we combine these two letters and they fit the context of Noach’s life story in Bibles and Tanakhs.

- Adam and Chavah (Eve) were placed outside the Garden of Eden. ן
- Noach (Noah) is a replica of Adam who also lived outside the Garden of Eden. ן
- Noach (Noah) survived the flood on the outside of the Garden of Eden. He “continued outside”. ן

The name, “Noach” also contains the letter “vav” which is a picture of a nail, hook or some type of “fastener” that connects pieces together. We can see this association between the letter “vav” and the picture with our own eyes. In the Hebrew writings, this word “vav” is a hook that connects panels together to form a wall in the Tabernacle.

And for the west side were hangings of fifty cubits, their pillars ten, and their sockets ten; the **hooks** of the pillars and their fillets of silver. (*Shemoth/Exodus 38:12*)

Noah (Noah) built an Ark of gopher wood. The boards used to build the Ark were connected using some form of fastener.

**Make an Ark of gopher wood;** rooms shall you make in the Ark, and shall pitch it within and without with pitch. (*Bereshith/Genesis 6:14*)

One tree or one board does not provide protection from a flood. However, when the boards are connected together using fasteners and sealed with pitch, it is a barrier that can provide protection from the waters of a flood.

The name “Noach” means “continue securely outside”. Noah and his family are recorded as the only family “outside” the Garden of Eden who survived. They were “secure”.

Noah (Noah) was the shepherd who guided his family and the animals to a place of rest “outside” the Garden. The context of the passage itself confirms this definition in the lexicon as well as the ancient Hebrew pictographic letters. Both are in agreement.

Let’s define the name “Adam” now using the same ancient Hebrew pictographic letters.

אָדָם ( masc., אָדָם / a-dam) **Translation:** HUMAN **Definition:** Of, relating to, or characteristic of man. The first man. All of mankind as the descendants of the first man. (Derived from a root meaning "blood" and "of reddish color.") **KJV Translations:** man, Adam, person, **Strong's Hebrew #:** h.0120

“Adam” is also a Hebrew word and it means “man”. It is derived from the two-letter root using the letters “dalet” and “mem”. *The Ancient Hebrew Lexicon of the Bible* defines it the following way:

אָדָם (אָדָם) **Action:** Dumb, Silent, Sleep, Weep **Object:** Blood, Red, Pieces, Tear **Abstract:** Likeness, Compare **Definition:** Similarly, the grape plant takes water from the ground and moves it to the fruit where the water becomes the blood of the grape. **Ancient Hebrew:** The pictograph א is a door representing the idea of moving back and forth. The מ is a picture of water and can represent any liquid especially blood. Combined these pictures mean "the moving back and forth of water" or the "flowing of blood".

This two-lettered root is related to the flow of blood in the body of a man or animal. Doors open and close like the valves in a heart and blood flows through the doors which looks and behaves like water. The “dalet” is a picture of a door to a nomadic tent. The letter “mem” is a picture of waves in sea. We can see the association between the picture and the pictographic letters with our own eyes.

Blood is like water. Approximately 50% of our blood is water. Water takes the shape of its container. In our blood vessels, there are valves that open and close like doors. The four valves of the heart are the tricuspid, pulmonary, mitral, and aortic valves. These valves control the flow of blood through the heart by opening to allow blood to pass and closing to prevent it from flowing backward. The veins in the legs also have valves that prevent the backflow of blood. Modern science refers to them as “doors” that open and close.

### How did ancient people know these things existed in the body of a man, woman or animal?

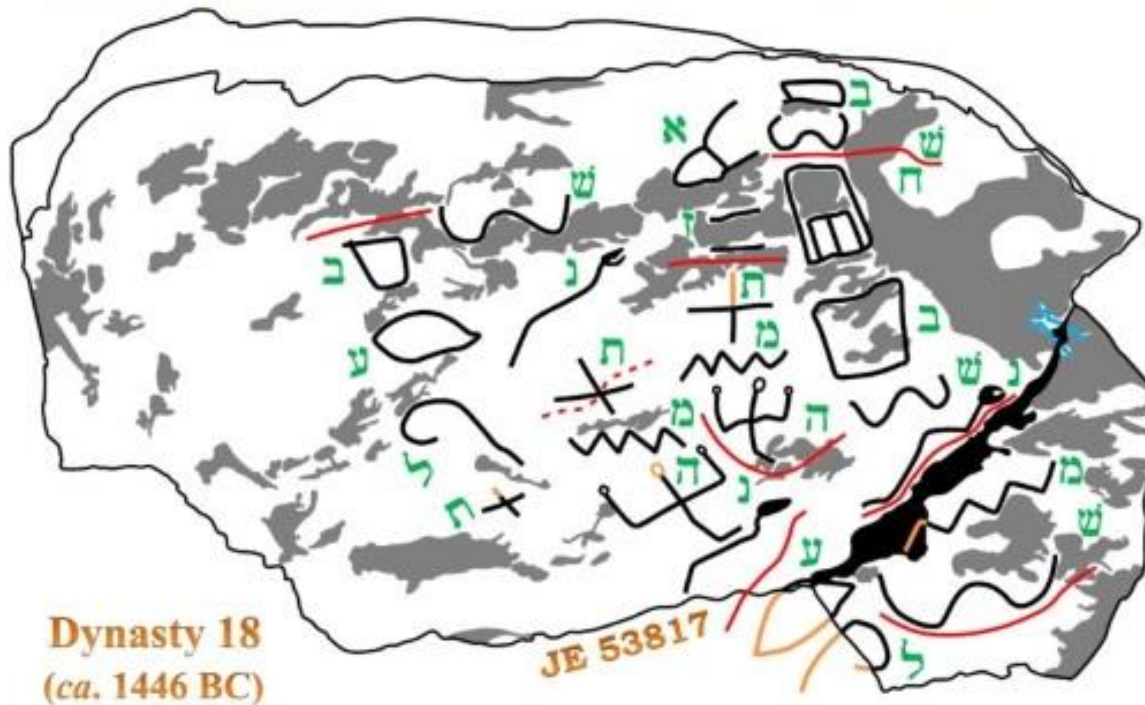

The pictographic letters depict the nature and character of blood quite well. We can see the relationship between these pictographic letters and the concept of blood. Every single living man and woman contain blood that flows inside of them. We would expect an Intelligent Designer to know these things. Engineers know the internal mechanisms in the robots they build. An Intelligent Designer would know the internal mechanisms within His creation which is illustrated in this two-lettered root for blood.

Other letters are added to the two-lettered roots to form different words in a Hebrew word family. They all have similar meanings related to the root word. The name “Adam” adds the letter “alef” to the root and it is a picture of an ox-head. This letter means “strength” because the ox is a very strong animal. When we put the pictographic letters together, “Adam” means “strong blood” or “strong moving back and forth water”.

All animals have blood that flows in their bodies. However, Adam is the seed that has authority over all other inhabitants of the earth. Mankind walks on two legs but all other animals walk on four legs. Gorillas and bears stand up on two legs when they challenge men, but in their normal routines, they walk on all four legs. We can see that Adam or mankind has authority over all the inhabitants of the earth. We can see these characteristics in the pictographic letters and the words they form. We can see these words are supported by the context of the Hebrew writings themselves.

These pictographic letters have been found on the walls in a turquoise mine used by ancient Egyptians. The location is called Serabit El-Khadim. Below is a copy of the inscription identifying the letters carved into the wall at this location: We can see many of the pictographic letters in the ancient Hebrew. And we can see the alef, mem, nun, and chet used in the names “Noach” and “Adam” in this particular inscription: א נ מ ח

**Sinai 361****Serâbîṭ el-Khâdim**

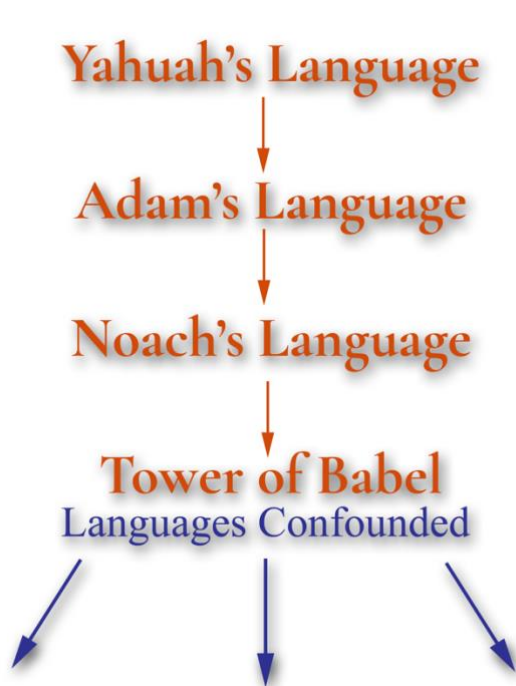

<https://www.ancient-hebrew.org/alphabet/new-discoveries.htm#2>

This inscription is dated to 1446 BCE (Before the Common Era). This was around the time of the prophet Moshe (Moses) when Hebrews would be working in these mines.

- The ancient Hebrew pictographic letters were in use during the time of the Prophet Moshe (Moses) evidenced by the carvings on the walls at this mining site. This is evidence that we can observe with our own eyes in the above illustration.
- The meanings behind the pictographic letters help define the words the prophet Moshe (Moses) used when he wrote his portion of the Hebrew writings. We defined the names “Noach” and “Adam” using the individual letters and then combining them together.
- The context of the Hebrew writings verifies the meanings of the words from an ancient Hebrew perspective. The actual context surrounding the name “Noach” verifies the meaning the name as determined by the ancient Hebrew pictographic language.
- Modern science also verifies the ancient Hebrew pictographic word for “blood” with blood flowing through the body like water. “Doors” in the form of valves exist in the blood vessels and heart that open and close. If we were to personally do an autopsy of a man or woman, we would be able to see these valves with our own eyes.

This is solid, reliable, irrefutable evidence. This is the kind of evidence we would see from an Intelligent Designer who is “intelligent” and has His own language. We would see evidence that would confirm and validate His identity. This is hard evidence that cannot be denied. It is not mythical or fabricated. There are many inscriptions found using this script. It is not a theory or hypothesis. These are facts. It is evidence we can see with our own eyes.

Noach (Noah) learned the Language of Yahuah and he taught it to his descendants until the time of the Tower of Babel when languages were confounded. Here is the text regarding this event and an illustration of this transfer of language from one generation to another.

**And the whole earth was of one language, and of one speech.** And it came to pass, as they journeyed from the east, that they found a plain in the land of Shinar; and they dwelt there. And they said one to another, Go to, let us make brick, and burn them thoroughly. And they had brick for stone, and slime had they for mortar. And they said, Go to, let us build us a city and a tower, whose top may reach unto heaven; and let us make us a name, lest we be scattered abroad upon the face of the whole earth. And Yahuah came down to see the city and the tower, which the children of men built. And Yahuah said, **Behold, the people are one, and they have all one language;** and this they begin to do: and now nothing will be restrained from them, which they have imagined to do. Go to, let us go down, and there **confound their language, that they may not understand one another's speech.** So,

Yahuah scattered them abroad from there upon the face of all the earth: and they left off to build the city. **Therefore, is the name of it called Babel; because Yahuah did there confound the language of all the earth: and from there did Yahuah scatter them abroad upon the face of all the earth.** (Bereshith/Genesis 11:1-9 KJV)

This testimony says that Yahuah created different languages. People who spoke the same language formed a group together because they understood one another. They were able to communicate with one another. French-speaking people would not group together with English-speaking people and vice versa.

**Is this why we have so many different languages today?**

**Is this a viable reason to explain this phenomenon?**

Of course it is. We have an Intelligent Designer. The Theory of Evolution is not possible. We have proven this, using statistics. Remember this number?

**10<sup>4,478,146</sup>**

This number is 10 with 4,478,146 zeros behind it. Renowned scientist Emile Borel says that events with a probability of  $10^{-50}$  are highly improbable, if not impossible. The number above is way beyond this category. Evolution is impossible. Therefore, the only plausible explanation for our existence is an Intelligent Designer. If an alien species were our Intelligent Designers, then we would see evidence of their language. Some researchers say the Sumerian language is from an alien species. However, there is not a people group today that speak or write this lost language.

The Intelligent Designer mentioned in the Hebrew writings gives a reason for confusing the languages. He is an Intelligent Designer capable of creating the magnificent human body. It seems He would have the intelligence to create a multitude of languages and understand them all. We create robots that can do this. If this is something we can do, then is it beyond the realm of possibility that an Intelligent Designer would be capable of doing such a thing on a much wider scale?

If our Intelligent Designer were to have confound the languages, we would expect one group of people in this situation to retain our Creator's Language. Testimony in the Hebrew writings illustrates this group of people were the "Hebrews".

Intelligent Designers are "intelligent" and would have their own highly complex language system. They would have imparted this language to their Creation so they would have a method of communicating with them. The Sumerian language has been lost and no longer in use but the Hebrew language continues to be preserved to this very day. We would expect an Intelligent Designer to preserve His language among His Creation so that He could continue to communicate with them in His tongue. The Intelligent Designer of the Hebrews is fulfilling these expectations with solid evidence.
